Summary

Full Stack Web Developer, background in machining, manufacturing and warehouse work. Completed college certificates in web design and development and computer science fundamentals at Salt Lake Community College, also attended the University of Utah coding bootcamp studying Full Stack Development (MERN).

Skills

HTML5   CSS3   JavaScript   Bootstrap   JQuery   Node.js
Express   React   MongoDB   MySQL   Sequelize   Git   Github
Machining   Fullstack Web Development   Strong work ethic   Reliability
Problem solver   Team work   Punctuality   Discipline

Education

***University of Utah*; Coding Bootcamp** (intensive 24 week Web Development program) studying HTML5, CSS3, JavaScript, jQuery, Node.js, PHP, Express.js, React.js, Database Theory, Bookshelf.js, MongoDB, MySQL, Command Line, Git, and more.*

***Salt Lake Community College*;** Computer Science Fundamentals
This Certificate prepares students for advanced studies in Computer Science including Software Development and Software Engineering. The curriculum includes topics related to software development, database management, and web development.

***Salt Lake Community College*;** Web Programming & Development,

Fundamentals of business as well as technical skills are emphasized, in order to utilize Web Programming and Development effectively in a business environment. The "business to consumer" and "business to business" paradigms are explored. Graduates are trained in the technical aspects of website management, preparation, development and implementation.

Experience

4/1/2019-Present   **3D Printing Technician**   **Optysis**   **West Jordan, UT**

Setup 3D printing machines with specified materials for printing parts, Monitor printing to ensure quality of parts. Remove parts when finished, heat treat parts, remove supports and finish parts to meet required measurements. Sand blast parts after measurements are within specifications then age harden when passed off by Q/A Inspector.

9/2017-6/2018   **Machinist II**   **Harris**   **South Salt Lake, UT**

Print documentation, setup machine for parts to be made with specific fixtures, cutting tools, and offsets for accurate machining of parts to measurements specified in documentation. Inspect parts for defects and accurate measurements with calipers or machine to ensure completion within deadline.

10/2014-9/2017   **Production Operator II**   **Harris**   **South Salt Lake, UT**

Print out documentation, mix silver ceramic to viscosity set in the documentation. Apply silver to machined parts with specific screens needed for correct electrical conduction with either hand screen or machines. Bake finished parts in a kiln at documented temperatures, inspect parts for defects and corrects strength of silver bonding by pull tests before the deadline.

1/2013-8/2013   **Backroom Team Member**   **Target**   **Midvale, UT**

Separated pallets of products into correct departments then stocked pallets into correct department shelves. Every hour of my shift pull products purchased from the previous hour and backstock excess products back onto storage shelves. Check backroom shelves for products customers request.

11/2011-8/2012   **Document Processing**   **MedUSA**   **Sandy, UT**

I collect and separate all the outgoing mail by weight, stamp the appropriate price on the envelope and prepare them for the currier to take to the post office.
Open all the bags from the previous day and create batch sheets and add up slips and scan payments into the system. Check in and out all documents for medical billers to bill and collect.

1/2011-8/2011   **Order Selector**   **Associated Foods**   **Farr West, UT**

Sign into order system, grab order sticker and sign into order. Travel to locations in warehouse gather products and stack them on a pallet till order is complete. Take pallet to loading dock to be loaded onto trailers for transport.
